## ½" FIRE GLASS COLLECTION

One of our most popular products, our ½" Fire Glass is made from premium grade, high quality, tempered safety glass. When used properly in your fireplace or fire pit, it will not melt, degrade, create soot or ash, and will not release toxic fumes into our environment. The wide range of colors allow you to use your creativity to mix and match to create artistic and elegant fire effects. Our premium reflective Fire Glass is unique, as it provides a more intense and vibrant flame, as the reflective mirror-like finish picks up the ambient lighting in such a way that the glimmer is more intense and the reflective qualities are mesmerizing.

## 1/4" FIRE GLASS COLLECTION

Just like our larger Fire Glass, our 1/4" collection is made from premium grade, high quality, tempered safety glass. When used properly in your fireplace or fire pit, it will not melt, degrade, create soot or ash, and will not release toxic fumes into our environment. The wide range of colors allow you to use your creativity to mix and match to create artistic and elegant fire effects. Our premium reflective Fire Glass is unique, as it provides a more intense and vibrant flame, as the reflective mirror-like finish picks up the ambient lighting in such a way that the glimmer is more intense and the reflective qualities are mesmerizing.

# FIRE BEADS

Fire Beads are different than Fire Glass in that they are not pieces of glass, but instead, smooth, rounded beads and their smooth and polished look creates a very relaxing, serene environment. Perfect for your fireplace or fire pit, Fire Beads are fairly uniform in shape and size, at about  $\frac{1}{2}$ " -  $\frac{3}{4}$ " each. Fire Beads are impressive with an elegant, luminous glow and fluid, reflective qualities, that add a modern look to your indoor or outdoor décor. With many different shades available, ranging from light to dark, pairing them together can create an entirely new custom look. Several Fire Beads are also available with a subtle, iridescent luster reflective enhancement.
