

FireBug Bluetooth receiver works with the existing millivolt valve on most millivolt gas fireplaces or logs and is easily controlled by a free app download for IOS or Android

Fireplace Bluetooth Module Control

Bluetooth 4.0

Low energy Bluetooth 4.0 control for easy use with smart phone and tablets.

Smart Control

Control your fireplace from multiple smart phones and tablets. You will never lose the remote control again because you don't need one!

Coin Cell Battery

The FireBug runs on one coin cell battery, eliminating multiple battery replacements in a remote control and receiver module.

Cross Platform Compatibility

The FireBug works with most brands, including SIT, Skytech and most Millivolt control systems.

Compact in Size - Big on Features!

FireBug is the smallest control module for millivolt fires
(just 1.5" square x .5" thick)
