CROSS TIMBERS & RUSTIC TIMBERS RADIANT HEAT LOGS

Cross Timbers and Rustic Timbers form Hargrove's exciting new Radiant Heat Vented log series, offering much greater heating efficiency than traditional vented gas logs. These models are crafted in ceramic fiber, using an innovative new molding process, which allows us to recreate the highly detailed textures of nature found in our standard log series, while taking advantage of ceramic fiber's superior heat reflectivity and ability to glow naturally at a lower temperature than traditional log materials. Our Radiant Riser™ technology directs heat forward and helps push it into the room, giving radiant heat comparable to vent-free logs.

When ordering a Cross Timbers set, choose a Loose Log from the top of the page and match it with an Accessory Kit from pages 4 or 5.

*RG indicates Radiant Glow Kit included with logs

Cross Timbers was the 2007 Vesta Award winner in the Gas Logs category.

Rustic Timbers carries this award-winning technology a step forward, with more detail and greater efficiency.

Heating & Efficiency Comparisons

Cross Timbers and Rustic Timbers logs are designed to work effectively with any standard Hargrove accessory kit, however maximum heating efficiency is obtained when used with the System Four burner.

HIGHLAND GLOW VENT FREE

Tested to the ANSI Z21.11.2 2003 (vent-free) and Z21.60 2003 (vented) Standards

All Hargrove Vent Free models operate as Unvented Room Heaters when used in a masonry or manufactured fireplace with the flue damper closed or with vent free fireplaces listed and approved with Hargrove products.

Highland Glow Vent Free models are dual listed, and may be operated as a vent free set, or may be operated as a vented log set, in a wood burning fireplace with the chimney flue damper fully or partially opened.
